Technology Skills: HTML, CSS, JavaScript, jQuery, Heroku, Git, C# (ASP.Net), MySQL, MongoDB, Node.js, Express, MERN Stack

Business Competencies: Analytics, Problem Solving, Computer Science, Programming, Teamwork, Quality Assurance, Continuous Improvement, Communication, Relationship Building.

PROFESSIONAL EXPERIENCE

Project Manager (02/2020 – 05/2020)

Studio S Architecture, Charlotte, NC

Leveraged outstanding combination of technology skill and architectural knowledge to enable the permitting and construction processes by producing architectural document sets using cutting-edge IBC code requirements and local AHJ guidelines.

Key Contributions:

- Collaborated with representatives from the local AHJ to align architectural drawings with regulatory requirements as defined by the county.
- Fostered relationships with the customer to define and document a project vision including financial projections.

Page Two

- Used critical thinking and problem-solving ability to identify issues before designing practical and innovative solutions.

Architectural Technician I & II (08/2016 – 02/2020)

Gray Construction/Gray Architects & Engineers, Lexington, KY/Charlotte, NC

Orchestrated high-value construction projects (\$10 - \$60M) including coordination of subcontractors through all phases from design to completion. Led team meetings and acted as a critical resource for project stakeholders as a key point of contact and problem solver. Initially hired as Architectural Technician I and promoted in 2018 due to outstanding contributions.

Key Contributions:

- Maintained a complex system of documenting and filing project data and customer information in line with best practice.
- Ensured that subcontractors followed assigned procedures and protocols to accurately implement the project plan.
- Oversaw the internal document release process and communicated with the customer to support the proposal phase.
- Worked with Project Managers to validate architectural specifications in each proposal.
- Formulated working relationships and strategic alliances to meet and exceed client deliverables while securing referrals for future projects.
- Successfully designed a \$5M dollar office space for a global manufacturing company.
- Recognized as a top performer and awarded Project of the Year for design contributions to a \$42M project.
- Contributed to the launch of the Charlotte satellite office that now manages \$300M worth of projects annually.

INTERNSHIPS

Intern, Gray Construction/Gray Architects & Engineers
